

Every top AI model. One secure login. One bill.

Enterprise AI that makes your whole team faster — without asking you to pick one model, watch your data, or forecast a bill you can't predict.

Every team gets the model it wants — **without picking one.**

- The leading model from every major provider, one secure login
- No one opening personal accounts to get the model they need
- Model access set by policy, not by whoever has a credit card

Real workflows and agents — **built with you, or by us.**

- **Put repetitive work on autopilot** — invoice processing, follow-ups, reporting, data entry between systems
- **Skip the long AI project** — your team builds in plain English, or ours builds it with you
- **More productivity, less waste** — tuned for accuracy, security, and token cost, with a human in the loop where it counts

Nothing you touch ever leaves. **Nothing trains a model.**

- Zero data retention configured across every model
- Your data never trains anyone's model — ever
- One compliance answer for every model, not one per tool

One number your CFO **can actually forecast.**

- One all-in price per user — models, governance, coaching, automation, support
- Priced below a single premium AI seat
- No surprise consumption bills, no separate automation tool, no extra hire

THE OUTCOME

Adoption that compounds, a documented governance answer for your cyber-insurance renewal, and AI that moves the business without putting it at risk.

Start free: a 30-minute AI Risk & Shadow AI Assessment — your top three exposures and a one-page action plan to keep, whether or not you work with us.
